●An emergency earthquake warning (alert) is issued in case of earthquake estimated to have a maximum seismic intensity of 5 higher, that informs the area where strong shaking (seismic intensity 4 higher) is predicted as quickly as possible. If shaking with a seismic intensity of 6 higher, it will be announced as a special warning. 緊急地震速報(警報)は、最大震度 5 弱以上と推定した地震の際に、強い揺れ(震度 4以上)が予測される地域を、可能な限り素早く知らせる情報です。震度6弱以上の揺れが予想される場合は、特別警報として発表されます。

• Earthquakes: with a seismic intensity of 5 higher are the criteria for the announcement of an emergency earthquake warning. Until safety is confirmed, please assume that you're on standby at home. 震度5弱以上の地震は、緊急地震速報(警報)の発表基準です。安全が確認できるまでは、自宅行機を想定しておきましょう。

Back side: To secure safety 裏面:安全確保編

At school, children ensure their safety avoiding the following things in each place.

[Classroom] Go under the desk and protect themselves from falling objects.

[Hallway] Stay away from walls and windows and protect themselves from fallen objects such as glass and lighting.

[Gymnasium] Move to safe place and protect themselves from fallen objects of ceiling and lights.

[Play ground] Stay away from fallen objects and objects that may collapse, and evacuate to the central part.

On the way to school or home, ①Evacuate to the place where nothing fall off, nothing move to you, nothing fall over and be a Dangomushi =roly-poly (cover your head and stay low in a safe place).

2 Immediately move away from dangerous places (where landslides are likely to occur, river banks or on the bridges etc.)

③Evacuate to your house or school whichever is safer and closer.(In some cases, parks or shelters)

登下校中では、まず、①「潮ちてこない、・「移動して(聞いて)こない,「聞れてこない」場所へ避難し、建物の落下物,プロック場の倒壊等を逃れるため「ダンゴム>(頭部を保護し、安全な場所で姿勢を低く))。します。 次に、②危険な場所から速やかに速でかるようにします。(かけ崩れが起きそうな場所や川岸、橋の上など) 最後に、③ 自分の家か、学校が安全で近い方へ避難します。(場合によって、公園や避難所・避難場所)
